

## Executive Summary

### RootBeer

Update: 29th January 2024

<https://github.com/jusasin/cs472-group4>

## Highlights

There are two developers that have put in a lot of work towards this project and those two developers are Scott Alexander Bown and Mat Rollings. Most work was done through bug fixes or updates to different source file. Both developers have done a majority of the commits added to this repository while the rest did a few to one commit. As of 2021 since the last commits of the project, only 5 developers have added or updated information. These last commits were updates, debugging, or additions. There are multiple contributors that could have left the project by seeing when they last worked on the project. To mention by username: awaseem, StefMa, litrik and a few more.

## Useful Git Commands

Commands include: git branch, git checkout, git commit, and git push. These commands allowed me to traverse my repo and to turn this report in.
